

Abhay Raj Tyagi

Java Full stack Developer

IOT- Engineer

Mechanical Engineer

abhayrajtyagi207@gmail.om · Gorakhpur, Uttar Pradesh, India · github.com/Mrunknownkhiladi · mrunknownkhiladi.github.io/simple-portfolio · instagram.com/_abhayrajtyagi

PROFILE

Frontend developer and BCA (IoT) student focused on turning ideas into fast, responsive, and reliable interfaces. Comfortable where engineering meets visual design — from clean component architecture to thoughtful motion, accessibility, and performance. Currently building a portfolio with interactive WebGL and physics-based UI elements, and completing hands-on web development training.

EDUCATION

Bachelor of Computer Applications — Internet of Things	2024 – 2027
Deen Dayal Upadhyaya Gorakhpur University — Third semester · 7.60 CGPA · expected graduation 2027	
Diploma in Mechanical Engineering — Production	2022 – 2024
Government Polytechnic Sirsi, Sant Kabir Nagar — Completed with 65.6%	
Intermediate (Class XII)	2020 – 2021
St. Andrews Inter College, Gorakhpur — Completed	
High School (Class X)	2018 – 2019
Netaji Defence Academy, Sainik Vihar, Gorakhpur — Completed	

CERTIFICATIONS

N.E. Railway — Mechanical Workshop, Gorakhpur	2024 · 1 month
Wadhwani Foundation	2024 · 1 month

TRAINING (IN PROGRESS)

Software Development Training & Placement, Noida	2025 – 2027
Web Development — QSpiders. Building modern, responsive, high-performance websites and web applications while learning new technologies and delivering practical digital solutions.	

SKILLS

Expert	SQL, HTML / CSS, JavaScript, Tailwind CSS
Advanced	Core Java, Advanced Java, React, Hibernate
Intermediate	Spring

PROJECTS

IoT (Sensor) — Blind Stick

JavaScript · Ultrasonic Sensor · Arduino

Real-time object detection system using an ultrasonic sensor to help visually impaired users navigate safely.

IoT (Sensor) — Radar System

Arduino IDE · C / C++ · Arduino UNO

Designed and developed an Arduino-based radar system using an ultrasonic sensor to detect nearby objects in real time.
